

NEWS ALERT

Beli Manastir, July 19th 2010.

Expansion of production

EcoCortec d.o.o. proudly announces record sales for the first six months of 2010.

Thanks to your hard work and the recognized quality of EcoCortec products, our sales have increased by 380% yearly, compared to the first six months of 2009. These good results are an indication of serious market growth and increased demand for our Eco[®] and VpCl[®] product lines.

To meet growing market demands, we have initiated new investments in equipment and production machinery. We are setting up a second line which will double our capacity in production of heat sealable and zip-lock bags. In addition to this line we will install new gusset and slit and seal system for off-line production of bottom sealed bags. For 2011 we are planning the start-up of a new, specially

EcoCortec Ladies

designed extrusion line for the production of biodegradable films.

Projects that are underway will increase the range of our products and the total capacity by 30%, which is a guarantee of faster and better service to our customers.

Again, we want to express our sincere thanks to all our distributors for your continued support. We look forward to seeing you at our European Sales Meeting which will be held in Madrid on October 14-15, 2010.

Have a great summer!

EcoCortec Team
